One, you could read the entire file at the beginning of your V1 and store the commands in an array, one command at each index of the array. Then in your while loop, using the normal VISA write V1 and not the VISA write file V1, and write out array[0] during loop index 0, array[1] at loop index 1, etc.

A-Z Index - State  
Slashdot contributor Bennett Haselton writes \* In 2007, I wrote that you could find troves of credit card numbers on Google, most of them still active, using the simple trick of Googling the first 8 digits of your credit card number. The trick itself had been publicized by other writers at least as far back as 2004, but in 2013, it appears to still be just as easy.

Products - UCCU  
Credit card numbers are often typed in, input, transferred and quoted. All of this transmission can cause errors, especially considering that humans are involved. Humans often make mistakes in transferal. To try and minimize this, credit card numbers contain a check digit.
